1. Explain how your design supports active learning, safety, accessibility, and classroom management.

This classroom design supports active learning by providing both collaborative round tables and individual desk areas. It promotes safety through clear walkways and unobstructed access to exits. The spacious layout ensures accessibility for all learners, while the organized seating arrangement allows the teacher to easily monitor students and manage classroom activities.

2. Explain the reasons behind your design choices and how your layout can help create a classroom that is organized, safe, accessible, and conducive to learning

The layout was designed to balance group collaboration and independent learning. Round tables encourage discussion and teamwork, while desk clusters support focused tasks. Wide aisles improve movement, safety, and accessibility. Overall, the classroom is organized, safe, flexible, and conducive to learning, helping students stay engaged and productive.
